

JU Lost & Found

Reunite with Your Belongings Effortlessly

Our secure platform connects lost items with their owners across the Jahangirnagar University campus. Report, search, and recover in minutes—after you log in.

The Lost & Found Challenge

Losing an item on a large university campus can be stressful and recovery often relies on luck. We provide a centralized, transparent, and efficient system to solve this common problem.

Campus Scale

A large campus makes manual searching inefficient and time-consuming.

Trust & Security

Ensuring items are returned to the rightful owner requires a secure matching process.

Timeliness

Quick reporting and matching are crucial for high-value or essential items.

Reunite with Your Belongings Effortlessly

Our secure platform connects lost items with their owners across Jahangirnagar University campus. Report, search, and recover in minutes—after you log in.

How It Works: A Simple 3-Step Process

Our platform simplifies the entire lost and found workflow, ensuring maximum efficiency for both reporters and owners.

Report

Submit a detailed report for a lost or found item, including location and date.

Search & Match

The system automatically searches for potential matches between lost and found reports.

Recover

Once a match is confirmed, coordinate the secure collection of the item.

How It Works

Key Features for the JU Community

The platform is designed specifically for the Jahangirnagar University environment, focusing on ease of use and community trust.

Secure Login

Ensures that only verified university members can report and access contact information.

Instant Matching

Automated algorithms quickly cross-reference lost and found databases.

Mobile Friendly

Responsive design allows students to report items immediately from any location on campus.

Built for Community

Fosters a culture of helpfulness and integrity among students and staff.

Reporting a Lost Item

The "Report Lost" feature requires detailed information to maximize the chance of a successful match. All users must be logged in to ensure accountability.

- **Item Name & Description:** Specific details are key for identification.
- **Found Location & Date:** Pinpoint where the item was last seen.
- **Collection Point:** Specify the preferred location for retrieval.
- **Image Upload:** Adding a photo of the item (if available) greatly aids matching.

📄 The system uses these inputs to generate a match report, connecting lost items with found reports instantly.

The screenshot shows a web application interface for reporting a lost item. At the top, there is a navigation bar with links for 'Home', 'Report Lost', and 'Report Found'. Below this is a light blue banner with the text 'Welcome, AT!'. The main section has a dark teal background with the title 'Report Lost Item'. The form contains several input fields: 'Item Name', 'Description...' (a larger text area), 'Last Seen Location', and a date field with a placeholder 'mm/dd/yyyy' and a calendar icon. There is also a file upload section with a 'Choose File' button and the text 'No file chosen'. At the bottom right, there is a 'Report Lost' button and a 'Made with GAMMA' watermark.

Reporting a Found Item

The "Report Found" feature enables users to easily submit details about items they've discovered. Providing accurate information is crucial for reconnecting items with their owners.

- **Item Name & Description:** Detailed information helps lost item owners recognize their belongings.
- **Found Location & Date:** Specify exactly where and when the item was found.
- **Collection Point:** Indicate where the item can be retrieved by its owner.
- **Image Upload:** A clear photo of the item significantly improves the chances of a successful match.

❏ The system uses these inputs to generate a match report, instantly connecting found items with lost reports.

The screenshot shows a web interface for reporting a found item. At the top, there are navigation links: 'Home', 'Report Lost', and 'Report Found'. The main heading is 'Report Found Item'. Below this, there are several input fields: 'Item Name', 'Description...' (with a text area), 'Found Location', 'Collection Point', and a date field with a calendar icon and the placeholder 'mm/dd/yyyy'. There is also a file upload section with a 'Choose File' button and the text 'No file chosen'. At the bottom, there is a large 'Report Found' button. A watermark 'Made with GAMMA' is visible in the bottom right corner.

The Match Report: Connecting Owners and Finders

The Match Report is the final step, using an advanced matching algorithm with a score system to facilitate the secure return of lost items by connecting owners and finders.

How the Match Score Works

- **Calculation:** The match score is determined by a weighted algorithm that considers the precision of keywords in the item description, proximity of reported locations, and temporal closeness of dates.
- **Display to User:** Owners are shown a list of potential matches with their respective scores (e.g., "95% Match").
- **Key Information Provided (Post-Match):**
 - **Match Score:** The percentage certainty of the match.
 - **Item Description:** Details from the original report (unless visual confirmation is needed).
 - **Reporter Identity:** Name or ID of the person who found the item.
 - **Contact Details:** Secure email address for direct communication with the reporter.
 - **Previous History:** A record of the reporter's past activity to build trust and credibility.

Mark As Matched: Deactivating Reports

The "Mark As Matched" button allows users to signify that a lost item report has been successfully resolved, meaning the owner has been connected with their lost item.

- Deactivates the report from all active searches.
- Maintains a clean and efficient database.
- Prevents unnecessary contacts and irrelevant match suggestions.

The screenshot shows the JU Lost & Found web application interface. A modal dialog box is open in the center, titled "localhost says". The dialog contains the text: "Mark this pair as matched? This will remove them from the active list." Below the text are two buttons: "OK" and "Cancel".

The background interface shows the JU Lost & Found logo and navigation links: "Lost Found", "Search", and "Match Report". The main content area is divided into two columns: "Lost Report" and "Found Report".

Lost Report:

- Item: hair dryer ***MATCH***
- Location: uttor para ***MATCH***
- Date: 2025-10-13 ***MATCH***

Found Report:

- Item: hair dryer ***MATCH***
- Location: uttor para ***MATCH***
- Date: 2025-10-13 ***MATCH***

Below the reports, there is a section for descriptions:

- Lost Description: pink color hair dryer
- Found Description: pink

Below the descriptions, there is a section for the reporters:

- Lost Reported By: saki@gmail.com
- Found Reported By: bushra@gmail.com

At the bottom of the main content area, there is a green button labeled "Mark as Matched".

The screenshot shows the JU Lost & Found web application interface. A modal dialog box is open in the center, titled "localhost says". The dialog contains the text: "Marked as matched successfully!". Below the text is a single button: "OK".

The background interface shows the JU Lost & Found logo and navigation links: "Lost Found", "Search", and "Match Report".

Search Functionality

The search interface allows users to quickly filter through all active reports to find their item or verify a found item.

Item Type

Filter by category (e.g., Wallet, Phone, Keys, Books).

Reporter

Search by the name or ID of the person who reported the item.

Location

Narrow results by campus area (e.g., TSC, Cafeteria, CSE Building).

Search Results in Action: Wallet Example

When a user searches for a "Wallet," the system displays both lost and found reports that match the criteria, facilitating quick identification.

User Profile: Your Reports Dashboard

Each user has a personalized dashboard to track all their lost and found reports, providing transparency and control over their submissions.

Previous History: Complete Activity Overview

The "Previous History" section offers a comprehensive overview of all your past and current lost and found reports, consolidating them into one easy-to-access view. This feature allows you to see your complete activity history, track patterns in your reports, and build credibility within the community as a consistent and reliable user. It's your personal archive of all interactions, providing transparency and insight into your contributions.
